

## Type of Incident

(example: Slip-Trip, Fall from Height, Vehicle , Laceration, Chemical Exposure)

### Summary:

Employee was working on a customer site setting up / inspecting a compressors flywheel belt for tension.

During this task, he slipped grasping the belt (motor isolated) to steady himself. With the momentum of his pulling of the belt, he jammed his finger between the belt and the motor pulley.

### Root Causes:

- Oil had leaked from the compressor which had caused a slipping hazard.
- Pre work inspection of workarea had not been carried out

### Actions Taken Thus Far: Next Steps

- Review current risk assessment for task
- Provide education and training for all service personnel in the importance in carrying out a pre-work inspections.
